

THIS CERTIFICATE IS AWARDED TO

# Lake Ag

In recognition of their participation in the PSA Program.

CROP YEAR  
**2025**

John Mesko, PSA CEO

The PSA Program uses the Sustainable Outcomes in Agriculture standard, which provides a framework that empowers growers and supply chain companies to measure, promote, and improve regenerative agriculture outcomes. The Standard is benchmarked to the latest version of the Sustainable Agriculture Initiative Platform's (SAI Platform) Farm Sustainability Assessment (FSA), FSA 3.0, at the gold-level. Participating in an on-farm sustainability assessment that is benchmarked to FSA meets current industry requirements and ensures that performance is evaluated against globally recognized best practices.
